AI Detection Model

Standard 2.0  ▼[Scan Again](#)

Looking for turbo or our multi-language version? Select it from the AI detection model dropdown.

This paper compares James Madison University's (JMU) Honor Code with copy- right infringement laws. It explores key principles, implications, and consequences of each. Thus, a comprehensive analysis of academic and legal standards is acheived.

Plagiarism is a misuse of another individual's work and an academic offense. Copyright infringement is a legal violation. This paper elucidates distinctions and similarities between Plagiarism and Copyright infringement. As cybersecurity professionals, our field requires the highest standards of integrity and ethics.

## Highlighting Color Key

Originality.ai

Balance: 1603

70% confidence this sentence was human written.

90% confidence this sentence was human written.

**AI RESULTS****PLAGIARISM****FACT CHECKING****READABILITY****100% Original 0% AI***Standard 2.0 - Jun 15, 2024***Originality.ai**

This score reflects our AI's confidence in predicting that the content scanned was produced by any popular AI tool such as ChatGPT, GPT-4o, Gemini 1.5 Pro, Claude 3, Mistral, Llama 3 etc. A score of 90% Original and 10% AI should be thought of as "We are 90% confident that this content was created by a human" and NOT that 90% of the article is Human and 10% AI.
